EXPERIENCE

Information Systems Intern

May 2024 – Present

Nissan North America | Franklin, TN

- Configure and optimize various Salesforce environments, focusing on integrations, automation, and user management
- Build and optimize data reports and dashboards to support decision-making in areas such as telematics subscription services, EV strategy, and vehicle leasing programs
- Define and execute deployments with Salesforce CLI and GitHub, collaborating cross-functionally with vendors to gather metadata components and optimize environment management
- Develop internal applications to match business needs, including a tool that manages Salesforce licenses across Nissan, improving visibility, resource utilization, and forecasting under the global license agreement
- Support User Acceptance Testing (UAT) for Nissan Store, documenting and ensuring alignment with user requirements

Salesforce Intern

Jan 2024 – May 2024

University of Kentucky Information Technology Services | Lexington, KY

- Ensured data integrity through ETL processes and validation, using Tableau and Excel to improve data-driven decisions
- Managed and staged communication campaigns via email and SMS, driving student engagement and retention initiatives
- Administered user profiles and permission sets to maintain appropriate Salesforce platform access across the university

Information Technology Intern

Jul 2023 – Jan 2024

Box Lake Networks | Winchester, KY

- Implemented an interactive customer-facing quoting form, integrating with Salesforce to streamline lead generation
- Configured internal CRM solution to align with business processes, improving marketing and sales automation
- Designed and deployed client websites, utilizing WordPress to ensure optimal performance, security, and usability

Junior Salesforce Analyst

Sep 2022 – Dec 2022

Coastal | Lexington, KY

- Attained Salesforce Administrator certification, reinforcing advanced knowledge in enterprise Salesforce configuration
- Learned to gather user needs to document business processes, aiding in the accuracy of Salesforce implementations
- Built customer service workflows for a mock client, enhancing case resolution through automation and self-service portals, and delivered a formal presentation to company directors for feedback and alignment
